## Administration Guidelines for the Heggerty Phonemic Awareness Assessment 1st Grade Form C

## Purpose:

The purpose of this assessment is to gather information about a student and monitor progress with the Heggerty Phonemic Awareness lessons. This is not a normed assessment, so teachers may use examples when introducing each skill. Options for correct and incorrect responses are provided for teacher administration.
This assessment can be used to gather baseline data about a whole class prior to implementing the Heggerty Phonemic Awareness curriculum as part of daily literacy instruction.
This assessment is not required to use the Heggerty Phonemic Awareness curriculum.

## Assessment Materials:

The materials required for this assessment include:
$\rightarrow$ One copy of the assessment for each student
$\rightarrow$ Pencil

## Administering the Assessment:

- The assessment is administered individually to students.
- Phonemic awareness is oral and auditory, so the assessment administrator will record all responses. There is no student copy provided for the student, and the students do not read or write words during the assessment.
- Mark a correct response with a plus sign (+) in the Student Response column.
- Mark an incorrect response with a dash (-) and record the incorrect response. There is a place to record student errors, as this can inform instruction.

Discontinue: You may discontinue the skill if there are no correct responses within the first 3 words.
Response Time: If a student is unable to give a response within 4 seconds, the administrator can move onto the next assessment word. Indicate this in the Observation checklist for each skill.

Visual Support and Hand Motions: We do not require hand motions to be used during this assessment administration. However, if the administrator finds that visuals such as counters or chips, or tapping/chopping sounds would be helpful, he/she may decide to use these as a support. This would be noted on the Scoring Guidelines page at the end, or it can be noted for each skill.

Observations: There is a place to record student observations for each skill, and overall with the scoring guidelines. These observations can be used to inform instruction during whole group lessons or for intervention.
